Welcome

Dear Friends,

The information you are about to receive is a summary of the current C-RS management systems. The Lockstep module (Mangement Information System) is a C-RS developed software that supports the running operations of the organization. The software functions include membership management, event management, and financial tracking. The database structure allows for efficient tracking of membership data, ensuring that all members are up-to-date with the latest information.

To access the online management systems, you will need to log in at https://carpathorusynsociety.wildapricot.org/, using your username and password. Please ensure that you change your password regularly for security purposes.

Benefits of the C-RS Management System

1. Membership Site: The membership website at https://carpathorusynsociety.wildapricot.org/ is a comprehensive platform that includes a wide range of features to support the C-RS's mission.

   - Membership site: https://carpathorusynsociety.wildapricot.org/
   - Designed and compiled by Alexis McCormick
   - Please submit your content to president@c-rs.org.

   - Contributions are always welcome! Please submit your news contributions to am@c-rs.org.

   - Membership site: https://carpathorusynsociety.wildapricot.org/
   - Please submit content to am@c-rs.org.

2. Advanced Registration

   - The advanced registration feature is ideal for events that require additional information from registrants, or span multiple sessions. This feature also includes the ability to automatically generate a guest list for the sponsor's use. The registry data is generated for the sponsor's use.

   - A single event registration can be set up well in advance of the event, allowing for easy tracking of registrations. The online events registration is quick, easy, secure, and efficient.

   - Events sponsored by the C-RS and its chapters/branches are posted on the events page and are generated for the sponsor's use. The events feature also provides the ability to register for the event online, which is fast and convenient for attendees. The website then sends the event host a system-generated notification as to whether there was a guest registered or not.

   - The only requirement for advanced registration is event details and setting up the event email announcement.

3. Simple Registration

   - Simple registration events require less setup and provide for one-click registration (RSVP only) by the registrants. The convenience of simple registration is especially appreciated by attendees, allowing them to register for an event quickly and effortlessly.

   - Simple events do not allow for guests, registration limits, and cannot include multiple sessions.

   - The events management feature provides two options for registering, simple and advanced. The simple registration type is used when holding events that charge a registration fee, or when allowing for guests, registration limits, and spanning multiple sessions.

   - The only requirements for simple registration are event details and the setup of the event email announcement. A single email can be set up for the entire event, which is convenient for both the event host and the attendees.

   - Though fees are deposited in the national C-RS account, because of the audit trail, fees can easily be resubmitted to the national C-RS account for events held by the C-RS's chapters/branches.

   - The 25th Anniversary online registration is an example of the advanced registration feature. Additional registration information from the registrants is required, and whether there was a guest registered or not.

   - The national C-RS is dedicated to strengthening Carpatho-Rusyn culture in the United States and supporting Rusyn culture in the homeland in east central Europe. Information about joining C-RS and a membership application may be obtained on the C-RS statement, the C-RS is dedicated to manifesting Carpatho-Rusyn culture in the United States and supporting Rusyn culture in the homeland in east central Europe.
